

Cyber Reliant Protect for Ransomware

Next generation data protection safeguards end-user files from ransomware and other malware at run-time, so organizations can remain in control of their data.

93% report ransomware **infiltrating anti-virus** or **anti-malware** software

Average **ransom** demand was **\$679** in **2016**, more than **double** the \$295 demanded in **2015**.

33% of businesses have experienced a ransomware **attack** in the last year

70% of **businesses infected** with ransomware have **paid ransom** to regain access

Data is Exposed to Ransomware

Data Protection Challenge:

Ransomware has many variants and affects all industries.

- End user device targeted for ransomware

- Ransomware infection encrypts end user files

- Files decrypted if ransom is paid, otherwise permanently inaccessible

Ransomware Damage Impact:

Financial loss, productivity loss, disruption to critical infrastructure, safety, brand credibility, customer loyalty, revenue and more!

Cyber Reliant Protect Offers Data-Centric Security

Cyber Reliant Protect offers a unique, **data-centric solution** to protect files from ongoing ransomware attacks.

Cyber Reliant Protect only allows authorized apps to gain file access and **blocks** ransomware from encrypting files.

Cyber Reliant Protect **enables** the end user to **locally restore** files permanently deleted by ransomware, other malware, or accidentally.

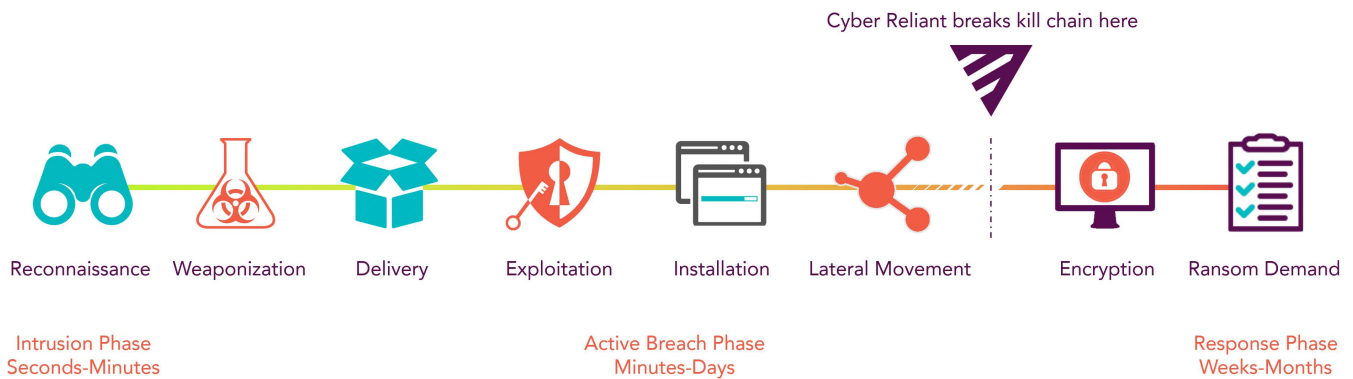

1. Encrypt
2. Shred
3. Disperse
4. Recombine

Encryption Alone does NOT Protect Against Ransomware

- Existing security approaches **are not** sufficient to protect data from ransomware.
- Anti-Malware software **will not** catch all variations.
- Most devices **are not** up to latest OS patch levels leaving them exposed.
- Trusted boot-up software alone **will not** prevent infection.

SOLUTIONS	FEATURES						
	Encryption	Shredding	Protection at Runtime	No Performance Latency	Fast Bootup & Bootdown	NIAP/CSfC Certification	Ransomware Protection

Ransomware Kill Chain Stopped by Cyber Reliant Protect

Benefits

- Minimize ransomware damage: no financial loss from ransom payment, brand damage, etc.
- Maintain control of your data
- Maximize operational productivity with minimal recovery time
- No dependency on backup servers or restore mounts
- Locally restore the latest version of your deleted files
- Run-time, data-centric protection

Supported Platforms:  Windows 7, 8.1, 10

About Cyber Reliant Corp

Founded in 2010, Cyber Reliant's next generation data protection stays with data to keep information safe and industries thriving. Cyber Reliant supports the classified or sensitive data protection needs of Government agencies (DoD and Intelligence communities) and companies in regulated markets, such as Healthcare and Financial Services.
